Profile Summary

Results-driven Head of IT with 16+ years of experience in Health Care IT. Proven track record of developing and executing strategic plans to drive business growth, improve operational efficiency, and increase revenue. Strong leadership skills with the ability to build and manage high-performing teams and execute complex projects on time and within budget. Skilled in data analysis, financial planning and analysis, and risk management. Proficient in Microsoft certified technologies, Oracle and MS SQL Server Databases, TSQL/PLSQL, programming languages such as Python, Django, ReactJS, and Cloud platforms like AWS. Experienced in implementing EMR/HIS in hospitals and managing enterprise IT infrastructure.

Project Management: Successfully executed health care projects in design and implementation for various hospitals and trained staff in using EMR and HIS. Worked closely with various Healthcare IT Developers as a SME and Techno-Functional Consultant.

Technical Expertise: MCP, MCSA, MCITP certified. Proficient in Windows Server Administration 2003 to 2019. Ubuntu 16+ in both stand-alone and Cloud environments like AWS and Azure. Strong knowledge of Oracle and MS SQL Server databases, SQL, PL/SQL, BI Publisher, XML publisher, OBIEE, and Microsoft Power BI. Experienced in product development using Python, Django, Django Rest Framework, ReactJS, Oracle, MS SQL, PostgreSQL, MySQL, and MongoDB.

Health Care Expertise: Good knowledge of standards such as NABH, JCI, and clinical subject matter experience in ICD, CPT diagnosis and procedures. Worked on tariff preparations, data sanitization for surgical packages and services for various TPA/Insurance Companies, CGHS payers, PSU's, and Corporates. Developed dashboards and reports for clinical, operational, and revenue data analysis using BI tools.
